<u>Mycotoxin</u>	<b>Median</b>	<b>% Not detected</b>	<b>% Safe</b>	<b>% Concern</b>	<b>% Potentially harmful</b>	<b>n</b>
<u>Aflatoxin</u> , ppb	0.00	96.03	3.43	0.43	0.11	933
<u>Vomitoxin</u> , ppm	0.21	31.72	28.02	38.33	1.93	621
<u>Zearalenone</u> , ppb	16.68	37.39	59.89	2.54	0.18	551
<u>Total T2/HT2</u> , ppb	0.00	80.81	17.79	1.39	0.00	933
<u>Fumonisin</u> , ppm	0.00	60.34	29.05	9.43	1.18	933
<u>Ochratoxin-A</u> , ppb	0.00	96.14	3.86	0.00	--	518
<u>Roquefortine C</u> , ppb	0.00	98.91	1.09	0.00	--	367

The distributions of mycotoxins presented are based on incoming samples tested at Dairyland Laboratories and may not be representative of the total population.

Detection limits: Aflatoxin (1 ppb), Vomitoxin (0.1 ppm), Zearalenone (10 ppb), Total T2/HT2 (5 ppb), Fumonisin (0.1 ppm), Ochratoxin (1.1 ppb), Roquefortine C (1 ppb)

Generally recognized as safe: Aflatoxin (0-20 ppb), Vomitoxin (0-0.3 ppm), Zearalenone (0-250 ppb), Total T2/HT2 (0-100 ppb), Fumonisin (0-1 ppm), Ochratoxin (0-250 ppb), Roquefortine C (0-1000 ppb)

Concern levels: Generally recognized as safe: Aflatoxin (20-130 ppb), Vomitoxin (0.3-2.5 ppm), Zearalenone (250-3900 ppb), Total T2/HT2 (100-700 ppb), Fumonisin (1-6.7 ppm), Ochratoxin (250-5000 ppb), Roquefortine C (> 1000 ppb)

Potentially harmful levels: Generally recognized as safe: Aflatoxin (>130 ppb), Vomitoxin (>2.5 ppm), Zearalenone (>3900 ppb), Total T2/HT2 (>700 ppb), Fumonisin (>6.7 ppm), Ochratoxin (>5000 ppb)

The safe, concern, and potentially harmful levels are based on recommendations for the amounts of mycotoxins in the **total ration dry matter** for cattle.
